

Table of Contents

1.	Application of Machine Learning Methods in Detecting Anomalies on L.O Cooler Component through	ougn
	Hyperparameter Optimization	1
2.	Orientation Holding Control for Autonomous Surface Vehicles using Adaptive Neuro-Fuzzy Infer	ence
	System Method	13
3.	Detection of Screen Printing Result Using U-Net Convolutional Neural Network Method to Imp	rove
	Quality Control	22
4.	Investigating The Engine Propeller Matching Of Triple Screw Ro-Ro Passenger Ship	31
5.	Localization Tracking for Autonomous Surface Vehicles Using You Only Look Once version 5 in	ROS
	Gazebo Simulator	40
6.	Calculate Energy Balance In Power Boilers Using Biomass To Determine Energy Requirements	47
7.	DIGISAFETY: Digitalization of Safety Inventory and Inspection System for Fire Protective Equipment	nent
	using AppSheet (Study at a Shipbuilding Company)	56
8.	The Effect of Increasing Catalyst Concentration of Fabricated Hydrogen Generator on Proton Excha	ange
	Membrane Fuel Cell Performance	66
9.	Quality Analysis of Outbound Container Stuffing using the Six Sigma Method in a Logistic Ship	ping
	Company in Surabaya	73
$10. The\ Effects\ Of\ Preheat\ And\ Filler\ Buffer\ Layer\ On\ The\ Materials\ Of\ ASTM\ A36\ In\ The\ Following the properties of\ ASTM\ A36\ In\ The\ Following\ ASTM\ A36\ In\ The\ A$		erlay
	Welding To Their Hardness And Metallography	86
11	.Design of Effective Liquefaction Unit in LNG Plant Process based on Economic Study	96
12	.The Design and Facility Layout of Traditional Boat-building Based on the Regression Model	107
